

DYNAMIC HEADREST HORIZONTAL ADJUSTMENT BAR

This device was designed for users who display strong extensor spasticity leading to ongoing breakage of headrest brackets and mounts. This device provides resistive movement rearward of the head and neck during extension then returns the head and neck to a preferred position.

- Provides resistance via the included Dynamic Horizontal Adjustment Bar
- Square shaft prevents headpad rotation during extension
- Adjustable +/- 2" of anterior/posterior positioning in vertical mounting bracket
- Can be used with vertical off-set bar or multi-axis triangle hardware
- Available to fit 3/4", 7/8", or 1" receivers

Miller's Dynamic Sq. Horizontal Adj. Bar, 7/8" Ball Assemblies
